Amendments to the Claims:

The listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

Claim 1 (Previously Presented) A dispensing device comprising:

(d) a reservoir containing a shear-thinning fabric cleaning liquid having viscosity profile such that from rest and up to an applied shear stress of 10 Pa the viscosity of the fluid is at least 100 Pa.s and under a shear field of 20 s-^{1} of at most 5 Pa.s

(e) one or more dispensing orifices in fluid communication with the reservoir

a movable platform movable by means of a screw mechanism, whereby rotation of a screw advances the movable platform against the stored, fabric cleaning fluid thereby dispensing a metered dose of the cleaning fluid from the reservoir to be dispensed via the dispensing orifices.

Claim 2 (Original) A device according to claim 1 wherein the platform comprises a wall or base portion of the reservoir and sliding the platform within the reservoir, progressively reduces the volume of the reservoir thereby forcing the fluid to exit the reservoir.

Claim 3 (Currently Amended) A device according to any preceding claimclaim 1 in which the reservoir and movable platform are non-circular in cross section, such that, in use, rotation of the reservoir relative to the platform is resisted.

Claim 4 (Currently Amended) A device according to any preceding claimclaim 1 in which the cross section of the reservoir and platform include at least one non-curved section.

Claim 5 (Currently Amended) A device according to any preceding claimclaim 1 in which the reservoir is uniform in cross section at least along the length in which the platform moves.

Claim 6 (Currently Amended)   A device according to ~~any preceding claim~~ claim 1 in which the platform is configured for reciprocal generally axial movement internally of the reservoir.

Claim 7 (Currently Amended)   A device according to ~~any preceding claim~~ claim 1 in which the platform is movable by means of screw mechanism.
